To The Chairman and Councillors of the
Langport Rural District Council

Mr. Chairman, Ladies and Gentlemen,

I beg to submit my Report for 1971.

A number of cases of measles were notified during the year but by far the most important illness was a small outbreak of Infective Hepatitis which occurred in the village of High Ham and which I have reported in detail in the text.

I have also drawn attention in the text to the importance of persons using private water supplies for domestic purposes to have them overhauled regularly; many of them are potential sources of illness.

It was a memorable year. The introduction of decimal currency in February caused considerable discussion at the time but was established quite smoothly. However, the cost of living seemed to rise dramatically at the same time.

There was a postal strike in the early part of the year which caused considerable delay in the Council's work and led to a certain accumulation of correspondence which eventually was cleared.

I am, Mr. Chairman and Councillors,

Your obedient Servant,

A. M. McCall

Medical Officer of Health

of the Committee on the
Longest Road

Mr. Chairman, Ladies and Gentlemen,

I beg to thank you for the

I should be glad to have you
but for the fact that I am
unable to do so. I am sorry
and wish I were present in person.

I have also been prevented
of course, and I am sorry
to have been unable to do so.

It is a pleasure to me
to have been able to do so
and I am sorry to have been
unable to do so.

I am sure that you will
be able to do so and I am
sorry to have been unable to
do so.

I am, Sir, your obedient servant,

Yours faithfully,

J. H. H. H.

JOHN H. H. H.

SECTION A

Statistics and Social Conditions of the Area

Population Following the census, the Registrar General has given the population of Langport Rural District as 14,970, a slight increase on the estimated population of the previous year. The Rateable Value was £414,704, and the product of a new penny rate was £4,200.

Birth Rate The corrected Birth Rate was 14.9 per thousand compared with a figure of 16 for England and Wales. There were 17 illegitimate births indicating that eight per cent of all live births in the Rural District were illegitimate in 1971.

Death Rate The corrected Death Rate was 9.9 per thousand, compared with a national figure of 11.6. Of a total of 166 deaths, 50 were due to heart disease, 29 were due to "strokes"; of the 42 deaths due to cancer, 11 were cancer of the lung, and a further 15 deaths were due to diseases of the respiratory system.

The expectation of life at the age of one year in England and Wales is 75.1 years for women and 69.1 for men. This shortfall of life expectancy for men due to smoking related disease is about two years in Britain. The mortality from smoking related disease in Britain is among the highest in the world. Cigarette smoking is the largest single avoidable cause of death in Britain today. Tobacco smoke is the most dangerous pollutant widely dispersed in Britain. It is, of course, a pollutant of many enclosed spaces, including Committee rooms, and there is some evidence of a harmful effect of "secondary smoking" on the non-smoker. Robert Herrick, writing in the 17th century, wrote the appropriate verse:

"Come, Let us go, while we are in our prime
And take the harmful folly of the time
We shall grow old apace, and die
Before we know our Liberty"

Appendix A, Table 3, shows full details of the causes of death.

SECTION A

Statistical and Social Considerations of the Problem

Population Following the census, the Registrar General has

given the population of London for 1937, a slight increase on the estimated population of the previous year. The increase was 1,000, and the number of a new family was 10,000.

Birth Rate The estimated birth rate was 12.9 per thousand compared with a figure of 12 per thousand in 1936. There was a slight increase in the number of births in 1937.

Death Rate The estimated death rate was 8.2 per thousand compared with a figure of 8.1 per thousand in 1936. There was a slight increase in the number of deaths in 1937.

The expectation of life at the age of one year in England and Wales is 72.1 years for a woman and 69.1 for a man. This is about 10 years more than in 1936. The increase in life expectancy is due to a decrease in the number of deaths in infancy and childhood. The increase in life expectancy is also due to a decrease in the number of deaths in old age.

Tobacco smoke is the most important cause of death in England and Wales. It is the cause of about 10 per cent of the deaths in England and Wales. The increase in life expectancy is due to a decrease in the number of deaths from tobacco smoke. The increase in life expectancy is also due to a decrease in the number of deaths from other causes.

It is also the fact that the number of deaths from tobacco smoke is increasing. The number of deaths from tobacco smoke is increasing at a rate of about 10 per cent per year. This is due to the fact that the number of people smoking is increasing.

Appendix A, Table 1, shows the details of the causes of death.

Maternal Mortality There were no maternal deaths in 1971.

Stillbirths There were four stillbirths during the year giving a rate of 18 per thousand total live and stillbirths compared with a national figure of 12.

Infant Mortality There was one infant death due to a congenital abnormality.

Social Conditions The pattern of life continued in much the same manner as previous years but 1971 was marked by a dramatic rise in the cost of living.

General Remarks There were no unusual deaths in 1971.

Statistics There were four stillbirths during the year.

During a year of 14 normal births five stillbirths

were recorded with a stillbirth rate of 35.

Infant Mortality There was one infant death due to a

congenital abnormality.

Child Mortality The pattern of life expectancy in 1971

was similar to previous years and this was reflected by a

constant rate in the rate of living.

SECTION B

General Provision of Health Services in the Area

The health services provided by the Somerset County Council continued unchanged. There was some division of responsibility with the setting up of the Social Services Department as recommended by the Seeborn Committee.

There was a slight reduction in the numbers attending the Hambridge, Langport and Somerton Child Welfare Clinics; at Curry Rivel there was a slight increase.

Appendix B, Table 2, gives full details of the medical inspections I carried out at various schools. It will also be noted that all the schools were visited by the school dentist with the exception of Kingsdon which had been inspected in September of the previous year.

A few cases of scabies were discovered at one school I inspected and these were reported to the private practitioner concerned for treatment.

The demand for playgroups continued and a new one opened at Huish Episcopi. Since October responsibility for playgroups has passed to the Social Services Department and I will no longer inspect them.

SECTION 2

General provision of public services in the area

The public services provided by the Council are as follows:

1. The Council is responsible for the provision of public services in the area.

2. The Council is responsible for the provision of public services in the area.

3. The Council is responsible for the provision of public services in the area.

4. The Council is responsible for the provision of public services in the area.

5. The Council is responsible for the provision of public services in the area.

6. The Council is responsible for the provision of public services in the area.

7. The Council is responsible for the provision of public services in the area.

8. The Council is responsible for the provision of public services in the area.

9. The Council is responsible for the provision of public services in the area.

10. The Council is responsible for the provision of public services in the area.

11. The Council is responsible for the provision of public services in the area.

12. The Council is responsible for the provision of public services in the area.

13. The Council is responsible for the provision of public services in the area.

14. The Council is responsible for the provision of public services in the area.

15. The Council is responsible for the provision of public services in the area.

16. The Council is responsible for the provision of public services in the area.

17. The Council is responsible for the provision of public services in the area.

18. The Council is responsible for the provision of public services in the area.

SECTION C

Prevention and Control over Infectious Diseases and Other Diseases

Fifty cases of measles were notified and two of whooping cough but by far the most serious infectious disease which occurred was infective hepatitis.

On 2nd March a private practitioner notified five cases of Infective Jaundice. He was contacted immediately and I was informed the first case was a woman who returned from West Africa and soon after developed Infective Jaundice, date of onset 26.12.70. The most recent case developed the illness on 16th February, 1971. All cases had made a satisfactory recovery.

On 19th April I received a second notification of a further five cases of Infective Jaundice. All occurred between 1st and 8th April. One 63 yr. old grandparent died in hospital of renal failure, the primary cause being Infective Hepatitis. I only discovered this casually six weeks later.

I contacted the private practitioner, the Health Visitor and Head Teacher asking to be informed immediately by 'phone of any further cases. I visited the school after the Easter holiday. All children were present and well.

On 26th May the private practitioner notified me by telephone of a mild case of jaundice - a schoolboy. The same morning the Head Teacher 'phoned my office informing me of the same case.

Following consultation with the Deputy County Medical Officer of Health and the County Pathologist, I requested sufficient immunoglobulin to inject all children and staff at the school from the Central Public Health Laboratory, Colindale. Consent forms were printed and issued the same day.

On 28th May I collected the globulin from the Public Health Laboratory, Taunton, and went to the school. There was 100% acceptance by the parents of susceptible children. I injected 45 children and five adults.

Section 2

Investigation and Control of the Epidemic of Typhoid Fever

First cases of typhoid fever occurred in two of the

groups but by far the most serious epidemic disease which

occurred was infectious hepatitis.

On the 10th of January, 1941, the first case of

infectious hepatitis, as was supposed at the time, was

reported. The first case was a woman who reported that her

and soon after developed infectious hepatitis, was of course

55.12.41. The next case was reported the 11th of 1941

February, 1941. All cases had been a relatively recent

On 15th April I received a letter from the

first cases of infectious hepatitis. All cases were

on April. On 21st of the following day in hospital of

hepatitis, the patient was found infectious hepatitis. I only

discovered this patient in the hospital.

I contacted the patient, immediately, the patient was

found to be in the hospital and was immediately of the

patient case. I visited the patient in the hospital.

All children were found to be well.

On 28th May the patient was found to be well.

of a child case of hepatitis - a relatively. The patient was

found to be in the hospital and was immediately of the

patient case. I visited the patient in the hospital.

of hepatitis and the patient was found to be well.

immediately to report all patients and staff at the school

from the patient's point of view, however, the patient

there were found to be well.

On 28th May I visited the patient in the hospital.

laboratory, however, and found the patient to be well.

reported by the patient of infectious hepatitis. I visited

25 children and 124 cases.

I contacted the school a month later. No further cases had occurred in the village since the date of the injections.

During the course of my investigation I discovered two cases, a mother and son who had Infective Jaundice but were not notified at all.

There was a total of thirteen cases with one death.

I carried out my routine B.C.G. programme against tuberculosis in the autumn. Children born in 1960 were those offered vaccination. I vaccinated 97 at Huish Episcopi Secondary Modern School and 10 at St. Gilda's Convent.

I paid several visits to the abattoir for the purpose of giving anthrax injections.

I contacted the school a month later. No further action
was occurred in the village since that time. I am not
positive the country of my investigation. I discovered two
cases, a woman and her son and another woman and her son
resided at all.

There was a total of thirteen cases with one death.
I carried out my research in 1980. Numerous deaths occurred
in the village. Children born in 1980 were found to be
I contacted 97 of them (97% of the total) and 10
of 97 (10.3%) were
I am not sure if the village is the largest for the region of
-very serious situation.

SECTION D

Environmental Health Services

A. Sanitary Circumstances

Climatic Conditions In 1971 the weather was generally equable with no extremes of temperature.

Water Supply The water supply provided by the Wessex Water Board was satisfactory throughout the year both in quality and quantity. The water was sampled regularly by the Board and all of the 69 samples they took were satisfactory as were the additional 14 taken by our own staff and submitted to the Public Health Laboratory at Taunton. Four private supplies were sampled and all were unsatisfactory. If all the private supplies in the Rural District were tested it is pretty certain that a very large percentage would be found to be unsatisfactory due to the poor maintenance private owners devote to their wells.

Drainage and Sewage Disposal At the present time six parishes have modern sewage disposal works and during the year the work of constructing the Eastern Sewage District Scheme for the parishes of Kingsdon, Charlton Mackrell, Keinton Mandeville with parts of Somerton, together with a new sewage disposal works at Somerton, proceeded. The cost of this scheme is £676,000. The Curry Rivel works, although of reasonably modern design, have not been giving a satisfactory effluent standard and the Council propose to overhaul the works at a cost of £37,000.

Public Conveniences The public conveniences at Langport and Somerton were well maintained but the latter were subject to very severe vandalism which necessitated a good deal of reconstruction. Most of this damage takes place late at night when there are very few travelling public and it might save the Council a lot of trouble and money if these were locked after 10 p.m.

Refuse Collection and Disposal The Council, using two vehicles, collected refuse from three parishes weekly and 22 fortnightly. Disposal was by controlled tipping. Part of the

Environmental Health Section

4. Health Department

Sanitation Conditions In 1971 the sanitary was generally

adequate with no extremes of temperatures.

Water Supply The water supply provided by the Western Water

Board was satisfactory throughout the year both in quality and

quantity. The water was supplied regularly by the Board and all

of the 63 samples taken were satisfactory as were the

additional 10 taken by our own staff and submitted to the Public

Health Laboratory at Taranaki. Four private supplies were sampled

and all were satisfactory. It all the private supplies in the

Health District were tested it is pretty certain that a very large

percentage would be found to be satisfactory and in the past

reliant on private supplies devoted to their wells.

Drainage and Sewage Disposal At the present time six parishes

have modern sewerage disposal works and during the year the work of

constructing the Western Bay of Plenty District Sewerage for the parishes

of Kaitake, Okeana, Kaitake, Kaitake, Kaitake, Kaitake, Kaitake, Kaitake,

Somerset, together with a new sewerage disposal works at Kaitake,

proceeded. The cost of this scheme is \$2,500,000. The County Council

works, although of reasonably modern design, have not been given

a satisfactory efficient treatment and the Council propose to improve

the works at a cost of \$1,000,000.

Public Health The public health services at Taranaki and

district were well maintained and the latter were subject to

very severe conditions which necessitated a good deal of

reconstruction. Most of this damage took place late at night

when there was very few travelling public and it might have been

Council a lot of trouble and money if these were looked after

in 1971.

Public Health and District The Council, during the

year, collected refuse from three parishes weekly and 22

parishes. District was by controlled tip-land. None of the

Council tip is let under an agreement to a scrap merchant who deals with abandoned and derelict cars.

Rodent Control The Council employed one full-time operator. They encouraged people to make contracts for regular inspection and treatment and 161 were in operation during 1971. These were inspected every three months. A total of 1,234 premises were inspected; 257 were found to be infested with rats and a further 85 with mice.

Nuisances Complaints of nuisances varied and included flies, mice, sewage in ditches and smells from piggeries. The Public Health Department dealt with these as promptly as possible but until the sewage scheme for the whole district is completed we will continue to have problems with effluent getting into drainage ditches.

Swimming Baths There are no public swimming baths in the district but a number of schools have private baths which are maintained by the school staff. The Council continued to support a swimming club for the handicapped which meets at the Yoovil Baths and a number of children from the district attend regularly and benefit considerably.

B. Factories Act

A number of inspections were made and details are given in Appendix D, Table 1.

C. Offices, Shops and Railway Premises Act

There are 60 premises registered under this Act and a number of routine inspections were carried out. No statutory action was required to ensure compliance.

D. Housing

During the year the Council erected 43 houses and a further 113 were built by private builders. The Council had a further 21

Council ship in 1911 under an agreement to a group movement who

deals with economic and political work.

Robert G. Gifford The Council employed the following members.

They arranged people to make speeches for various hospitals and churches and 181 was in position during 1911. These were included every year. A total of 1,111 people were included. 127 were found to be included with 100 and a further 12 with 100.

Robert G. Gifford Council of Ministers and Ministers of

which, except in 1911, and 1912, and 1913. The Council Health Department deals with those of property as possible but with the same amount for the same amount is included in will continue to have problems with different things. The Council

Robert G. Gifford There are no public relations in the district but a number of people have been in the district and maintained by the school staff. The Council continued to support a training club for the handicapped which meets at the local clubs and a number of children from the district attend regularly and benefit considerably.

B. The Council

A number of members were made and their names given in Appendix G, Table 1.

C. Officers and Staff

There are 10 members of the Council and a number of members of the Council who are elected. The Council has a number of members who are elected. The Council has a number of members who are elected.

D. Meetings

During the year the Council opened 10 houses and a number of members of the Council. The Council has a number of members who are elected.

in the course of erection and another 69 were being built privately. Since 1st April, 1945 the Council have built 770 and a further 1,228 have been built by private enterprise.

At the end of the year there were 198 applicants on the housing list which included 82 for old persons dwellings.

The Council continued to encourage applications for both standard and discretionary grants and gave approval to 42 discretionary grants and eight standard grants.

Full details are given in Appendix D, Table 2.

Caravans There are two licensed caravan sites in the district. One is permanent and one is seasonal. In addition there are 26 caravans licensed.

The problem of gypsies at Merrifield aerodrome continued and the Council came to an agreement with the Chard Rural District Council whereby they are building a permanent site for gypsies on the extreme boundary of our district. There will be sites for 15 vans.

E. Inspection and Supervision of Food

Milk Milk sampling was carried out regularly by the County Health Department and 49 samples of pasteurised milk were examined. One was found to be unsatisfactory. A further nine samples of raw milk were submitted to the laboratory.

Ice Cream There are 69 registered premises for the sale of ice cream. No sampling was done in 1971.

Meat The Council continued to give 100% meat inspection at all the slaughterhouses. Details of these inspections are given in Appendix D. Table 3. Several verbal warnings were given to slaughterhouse owners regarding minor contraventions during the year and these were, in due course, remedied.

Poultry Packing Establishments There are three poultry packing establishments with a weekly kill of approximately 2,145. No routine inspection of poultry was attempted.

Food Hygiene Regulations Eighty-three premises are subject to these Regulations and given routine inspection. No statutory action was taken under this Act during the year.

F. Animal Boarding Establishments

The two registered establishments were inspected and found to be satisfactory.

Good Review Questions Twenty-five questions are subject
to their examination and given passing inspection. On
standing system was taken under this Act before the year.

E. Medical Examinations

For the purpose of non-discrimination with reference to the
to be satisfied.

Housing

Action taken during year

| | | | | | | | | |
|-----|---|------|------|------|------|----|----|-----------|
| 1. | No. of houses included in Clearance Area for which Orders are still to be made | .. | .. | .. | .. | .. | .. | 3 |
| 2. | No. of houses in Clearance Areas which have been patched for temporary accommodation under Section 48 of the Housing Act 1957 | .. | .. | | | | | Nil |
| 3. | No. of houses closed or demolished under Section 42 of the Housing Act 1957 (Clearance Areas) | .. | .. | .. | .. | .. | .. | Nil |
| 4. | Housing Act 1957 (Section 17 - Individual Unfits) No. of houses lost: | | | | | | | |
| | (i) (a) Houses demolished | .. | .. | .. | .. | .. | .. | 3 |
| | (b) Houses closed | .. | .. | .. | .. | .. | .. | 6 |
| | (ii) For other purposes (road improvements, etc.) | .. | .. | .. | | | | 1 |
| 5. | No. of temporary dwellings (huts etc.) demolished | .. | .. | .. | | | | Nil |
| 6. | No. of houses declared unfit under: | | | | | | | |
| | (i) Section 9 of the Housing Act 1957 | .. | .. | .. | .. | .. | | Nil |
| | (ii) Section 72 of the Housing Act 1969 | .. | .. | .. | .. | .. | | Nil |
| 7. | No. of houses made fit during year | .. | .. | .. | .. | .. | .. | 9 |
| 8. | No. of unfit houses occupied under licence | .. | .. | .. | .. | .. | | Nil |
| 9. | Houses in multiple occupation (Housing Acts 1961 to 1969) | .. | .. | | | | | Nil |
| 10. | Reconditioning of condemned houses - Exclusion from Clearance/Demolition Orders (Housing Act 1961) | .. | .. | .. | .. | | | Nil |
| 11. | Substitution of Closing Order for Demolition Order Housing Act 1961. Action taken | .. | .. | .. | .. | .. | .. | Nil |
| 12. | Housing Act 1969 Section 28 General Improvement Areas Number of areas so defined | .. | .. | .. | .. | .. | .. | Nil |
| 13. | <u>Housing Act 1957 - Slum Clearance</u> | | | | | | | |
| | | 1972 | 1973 | 1974 | 1975 | | | |
| 1. | Part a. Houses in areas to be declared | - | - | - | - | | | |
| III | b. Houses to be cleared | - | - | - | - | | | |
| 2. | Part Houses likely to be subject to II demolition or closing orders | 33 | 35 | 35 | - | | | |
| 14. | Housing Act 1964. Any action taken during year | | | | | | | Nil |
| 15. | <u>Rent Acts 1968 and Housing Act 1969</u> | | | | | | | |
| | (i) Certificates of Fair Rent - Certificates issued (if known) | | | | | | | Not known |
| | (ii) Certificates of Disrepair | | | | | | | |
| | (a) No. of applications received | | | | | | | Nil |
| | (b) No. of Certificates issued | | | | | | | Nil |

Table 1

Summary

Table 1. Summary of data for the 1971-72 season.

1. The data are presented in the following order:

(a) The data for the 1971-72 season.

(b) The data for the 1970-71 season.

(c) The data for the 1969-70 season.

(d) The data for the 1968-69 season.

(e) The data for the 1967-68 season.

(f) The data for the 1966-67 season.

(g) The data for the 1965-66 season.

(h) The data for the 1964-65 season.

(i) The data for the 1963-64 season.

(j) The data for the 1962-63 season.

(k) The data for the 1961-62 season.

(l) The data for the 1960-61 season.

(m) The data for the 1959-60 season.

(n) The data for the 1958-59 season.

(o) The data for the 1957-58 season.

(p) The data for the 1956-57 season.

(q) The data for the 1955-56 season.

(r) The data for the 1954-55 season.

(s) The data for the 1953-54 season.

(t) The data for the 1952-53 season.

(u) The data for the 1951-52 season.

(v) The data for the 1950-51 season.

(w) The data for the 1949-50 season.

(x) The data for the 1948-49 season.

(y) The data for the 1947-48 season.

(z) The data for the 1946-47 season.

(aa) The data for the 1945-46 season.

(ab) The data for the 1944-45 season.

(ac) The data for the 1943-44 season.

(ad) The data for the 1942-43 season.

(ae) The data for the 1941-42 season.

(af) The data for the 1940-41 season.

(ag) The data for the 1939-40 season.

(ah) The data for the 1938-39 season.

(ai) The data for the 1937-38 season.

(aj) The data for the 1936-37 season.

(ak) The data for the 1935-36 season.

(al) The data for the 1934-35 season.

(am) The data for the 1933-34 season.

(an) The data for the 1932-33 season.

(ao) The data for the 1931-32 season.

(ap) The data for the 1930-31 season.

(aq) The data for the 1929-30 season.

(ar) The data for the 1928-29 season.

(as) The data for the 1927-28 season.

(at) The data for the 1926-27 season.

(au) The data for the 1925-26 season.

(av) The data for the 1924-25 season.

(aw) The data for the 1923-24 season.

(ax) The data for the 1922-23 season.

(ay) The data for the 1921-22 season.

(az) The data for the 1920-21 season.

| | Houses erected during year | | Houses in course of erection | | Gained from conversion of large houses or buildings into flats or dwellings | Lost from conversion of two or more houses into one |

* Molecular weight determined by osmotic pressure method.

EXPERIMENTAL

1. **Preparation of monomer:** A solution of 10 g of monomer in 100 ml of solvent was prepared. The solution was then subjected to a series of treatments to purify it. The purified monomer was then used for the polymerization reaction.

RESULTS AND DISCUSSION

The results of the analysis of the samples are given in Tables I and II. It can be seen that the elemental analysis of the samples is in good agreement with the theoretical values.

| TABLE III | | TABLE IV | |
|--------------------------------|-------------------|--------------------------------|-------------------|
